

Changes based on technical meetings

Hannah Albertus-Benham, Wood
3M PFC Settlement Subgroup 1 Meeting
October 21, 2020

Technical feedback so far

In progress:

1. Incorporate new municipal well sampling data - Cottage grove well 11 now above HI of 0.3 for Option 2
2. New well cost for Cottage Grove – growth related/match permitted capacity
3. Hydraulic analysis of Lake Elmo interconnect with Woodbury
4. Factor new connections due to expedited projects into storage prorated costs
5. Greater cost share for tank costs (Lake Elmo, Cottage Grove)
6. Verify WTP capacities for Cottage Grove and Oakdale
7. Prairie Island Indian Community – add in cost of storage tank and well upgrade

Technical feedback so far

More discussion necessary:

1. Demo of existing structures - Put together potential high level demo costs
2. Develop justification for building costs - find most conservative building cost
3. Update service lateral costs (Lake Elmo, Newport) - Maybe wait for all comments, and poll all communities?
4. Oakdale – well placements, additional well

Technical feedback so far

Additional updates:

1. Update sampling data across recommended options
2. Split out Appendix E.4
3. Release modeling data after plan is finalized, pending data disclaimer
